This piece is totally glitched. Pass the vape.

You died on Earth during the Fall, but your backup made it off-world. You spent years as an infugee in cold storage before being revived and sleeved in a cheap synthetic morph, the cost of which you had to pay off building new habs. Desperate to escape your situation, you volunteered for high-risk, high-pay gatecrashing missions. You survived three. On the last, you discovered relics of a long-dead alien race and were recruited by Firewall. After retiring from gatecrashing, you immersed yourself in scum culture. You're nerd-famous for your nanotech recycler meshcast *GraxaGirl*.

CRIMINAL GUANXI OPS

Amaru is a stone professional, but you wish he'd loosen up. Pivo is all business, but fun to geek out about tech with. Berk is wild and fun, but hell is she violent, too.
